

分数 (11)

分数のひき算 ①

1/24(月)

名前

5年

解答

月 日

● 次の計算をしましょう。

$$\textcircled{1} \frac{1}{4} - \frac{1}{6} = \frac{3}{12} - \frac{2}{12} = \frac{1}{12}$$

$$\textcircled{2} \frac{2}{3} - \frac{1}{2} = \frac{4}{6} - \frac{3}{6} = \frac{1}{6}$$

$$\textcircled{3} \frac{2}{3} - \frac{1}{12} = \frac{8}{12} - \frac{1}{12} = \frac{7}{12}$$

$$\textcircled{4} \frac{2}{5} - \frac{1}{6} = \frac{12}{30} - \frac{5}{30} = \frac{7}{30}$$

$$\textcircled{5} \frac{7}{6} - \frac{1}{4} = \frac{14}{12} - \frac{3}{12} = \frac{11}{12}$$

$$\textcircled{6} \frac{7}{4} - \frac{7}{5} = \frac{35}{20} - \frac{28}{20} = \frac{7}{20}$$

$$\textcircled{7} \frac{5}{3} - \frac{3}{2} = \frac{10}{6} - \frac{9}{6} = \frac{1}{6}$$

$$\textcircled{8} \frac{5}{4} - \frac{4}{7} = \frac{35}{28} - \frac{16}{28} = \frac{19}{28}$$

$$\textcircled{9} \frac{6}{5} - \frac{2}{3} = \frac{18}{15} - \frac{10}{15} = \frac{8}{15}$$

$$\textcircled{10} \frac{8}{5} - \frac{9}{7} = \frac{56}{35} - \frac{45}{35} = \frac{11}{35}$$

分数 (12)

分数のひき算 ②

● 次の計算をしましょう。

約分がしてあるかな。

$$\textcircled{1} \frac{5}{6} - \frac{3}{10} = \frac{25}{30} - \frac{9}{30} = \frac{16}{30} = \frac{8}{15} //$$

$$\textcircled{2} \frac{2}{3} - \frac{1}{15} = \frac{10}{15} - \frac{1}{15} = \frac{9}{15} = \frac{3}{5} //$$

$$\textcircled{3} \frac{11}{12} - \frac{2}{3} = \frac{11}{12} - \frac{8}{12} = \frac{3}{12} = \frac{1}{4} //$$

$$\textcircled{4} \frac{1}{2} - \frac{1}{10} = \frac{5}{10} - \frac{1}{10} = \frac{4}{10} = \frac{2}{5} //$$

$$\textcircled{5} \frac{13}{18} - \frac{1}{6} = \frac{13}{18} - \frac{3}{18} = \frac{10}{18} = \frac{5}{9} //$$

$$\textcircled{6} \frac{4}{9} - \frac{5}{18} = \frac{8}{18} - \frac{5}{18} = \frac{3}{18} = \frac{1}{6} //$$

$$\textcircled{7} \frac{8}{9} - \frac{1}{18} = \frac{16}{18} - \frac{1}{18} = \frac{15}{18} = \frac{5}{6} //$$

$$\textcircled{8} \frac{4}{5} - \frac{2}{15} = \frac{12}{15} - \frac{2}{15} = \frac{10}{15} = \frac{2}{3} //$$

$$\textcircled{9} \frac{7}{12} - \frac{1}{30} = \frac{35}{60} - \frac{2}{60} = \frac{33}{60} = \frac{11}{20} //$$

$$\textcircled{10} \frac{9}{10} - \frac{3}{20} = \frac{18}{20} - \frac{3}{20} = \frac{15}{20} = \frac{3}{4} //$$
